

J109 yachts to Cork and back

About Sevenstar

On the majority of routes we use one of 120 company owned vessels. This provides us with better control of the schedule and route of the vessel and at the same time it means that the crew on the vessel are well versed in looking after delicate racing yachts.

To ensure the safe loading, transport and discharging of your yacht we put a lot of focus on having our highly experienced operations team develop a detailed loading and cradling plan.

Our company has invested heavily to future proof our vessels for the new 2020 IMO regulations.
